SUMMARY

Frontend and full-stack engineer with 4+ years of production React, Next.js and TypeScript, including frontend team-lead roles at three companies. Builds the platform of an AI call-center product live with 10 client companies: real-time call monitoring, data-heavy tables and dashboards, and a multi-tenant permission system covered by 700+ automated access checks, on a Django REST backend. Set up a pnpm monorepo with a shared design system and uses coding agents every day. M.Sc. in Cybersecurity in progress. Based in Istanbul; open to remote roles or relocating to Germany.

SKILLS

Frontend: React, TypeScript, Next.js, shadcn/ui, Tailwind CSS, Material UI, design systems, component libraries, accessibility

Architecture: Feature-based modules, hooks and typed API layers, TanStack Query, Zustand, Redux, monorepos (pnpm workspaces)

AI: Coding agents daily, AGENTS.md and agent skills, UIs for LLM voice/chat agents (LiveKit, OpenAI)

Quality & CI: Playwright, Jest, Cypress, CI type checks, GitLab CI, code review

Backend reading: Python, Django REST Framework, Node.js, REST APIs, WebSockets, JWT/OAuth 2.0, Docker

EXPERIENCE

Full-Stack Developer · Dizayn VIP · Istanbul 03/2025 – Present

- Built the call-center management platform in Next.js 16, React 19, TypeScript, shadcn/ui and next-intl (English/Turkish), connected to a Django REST backend and a LiveKit Agents voice pipeline (OpenAI LLMs)
- Real-time call monitoring dashboards with WebRTC and WebSockets
- Designed multi-tenant RBAC: 50+ permissions across 13 modules, enforced on every API endpoint, with field-level hiding of transcripts, recordings and phone numbers
- Wrote 700+ automated access checks and Playwright UI tests
- Built reusable React components, custom hooks and data-visualization charts; managed server state with TanStack Query (pagination, mutations, cache invalidation) to avoid layout shifts
- Improved Core Web Vitals with code splitting, dynamic imports, lazy loading and optimized responsive images; built WCAG-aligned accessible tables

Frontend Team Lead (Part-Time) · Invizion Holding · Istanbul 09/2025 – 03/2026

- Set up a pnpm monorepo with a shared design system used across products
- Introduced AI-assisted development for the team: AGENTS.md files, agent skills and output validation
- Data-intensive CRM, order and admin views with reusable data tables, bulk actions, route guards and consistent loading, empty and error states
- Led the frontend team for CRM and order-tracking apps (React, Next.js, TypeScript)

Full-Stack Developer → Frontend Team Leader · Mazaya Integrated Co. W.L.L · Remote 06/2022 – 02/2025

- Promoted from Full-Stack Developer to Frontend Team Leader; led the frontend team across several concurrent client projects
- Built responsive React and Next.js applications end to end and integrated CRM systems and REST APIs
- Technical SEO across 50+ pages (metadata, semantic HTML, SSR/SSG) and improved page performance and rendering strategy
- Set coding standards, ran code reviews for every merge and guided engineers on architecture decisions

Frontend Team Leader (Part-Time) · Ibtekar Co. for Tech Solutions · Remote 11/2023 – 06/2024

- Reusable React component library shared across education, finance and voting products
- Data-heavy dashboards for schools handling bulk student and class data
- Integrated Laravel/MySQL REST APIs with async loading and error handling; resolved API contract mismatches with the backend team

SELECTED PROJECTS

- **PDFPal SaaS (2024):** Stripe billing, Kinde auth, tRPC, Zod and Prisma; chat with PDFs via LangChain
- **Real-Time Chat Application (2025):** Live chat rooms with React, Django Channels, Redis and JWT auth
- **Phone Cover E-Commerce (2023):** Next.js shop with Stripe payments, Prisma, auth and image uploads
- **Personal Portfolio (2026):** Next.js site in four languages with custom animations and sound

EDUCATION

M.Sc. in Cybersecurity · Üsküdar University · Istanbul 2026 – Present

Focus: application security, penetration testing

B.Sc. in Mathematics · University of Baghdad 2015 – 2019

Operations research thesis (Grade A); linear programming, cryptography, C++

LANGUAGES

Arabic (native) · English (fluent) · Turkish (beginner)
